

Let's join us to fight and give everybody a chance !

Mister President,

We have joined Michel Point in his project for months. This ambitious and workable project is to take part in Dakar as a navigator.

We and lots of people – politics, sponsors, press, TV, Web users – felt incensed by the invalidation of Michel's licence. Today, we are very happy to know that you are going to support Michel by defending his project in June before the world committee.

Once again, we draw your attention to the comment "except blind people" of the article 11.1 International restrictive navigator licence – Annex L of the International Sports Code of October 2002.

We can admit that blindness and motor racing are incompatible. But it is discriminatory to make a difference between blind people and people with another handicap which prevent them from practicing motor races. According to this article, this last can get a restrictive navigator licence. We want all handicapped people to be treated as equal. Let's stop being prejudiced against handicapped people.

This petition is aimed at supporting you before the FIA.

There are no concrete arguments which could prevent this project from succeeding ! We are ready to fight again to denounce this discriminatory situation.
